

Weasler®

CROSS & BEARING KIT

DESIGN FEATURES

Larger roller bearings

High temperature triple lipped seal keeps grease in and contaminants out

E-Kits can be recognized by the orange seal

- Bushing Lube located on the cup provides easier access for lubrication.
- E-Kits are available for all series and Standard kits can be upgraded to E-Kits.
- Manufactured with high quality steel for increased strength.

Extended Lubrication Kit

E-kits provide increased capacity and extended lubrication intervals with a lube cycle of 50 - 250 hours and are interchangeable with standard cross and bearing kits. This is achieved by providing an improved seal and roller bearings design, which results in a longer life cycle.

PERFORMANCE BENEFITS

- EXTENDED LUBRICATION CYCLE OF 50 TO 250 HOURS.
- INTERCHANGEABLE WITH STANDARD CROSS AND BEARING KITS AVAILABLE IN THE MARKET.
- EASIER GREASE ACCESS THROUGH THE GUARD, NO NEED TO REMOVE THE GUARD.
- HIGHER TORQUE CAPACITY AND LONGER LIFE REDUCES DOWNTIME - AVOID COSTLY CROSS AND BEARING KIT REPLACEMENTS.

Higher Value · Smarter Solutions

MANUFACTURING LOCATIONS

WEASLER ENGINEERING, INC.
 P.O. Box 558
 West Bend, Wisconsin, 53095 USA
 Tel: +1 (262) 338 2161
 Email: oesales@weasler.com

WEASLER ENGINEERING TURKEY
Power Packer Turkey
 Akhisar Organize Sanayii Bolgesi 5.
 Cadde No: 33
 Akhisar Manisa 45230
 Turkey
